### **Sampling Decisions:**

We have undertaken target-oriented method for sampling. Our target research included Facebook, Direct E-mail, messages, and universities in Dhaka city.

### **Sample Design:**

**1. Sample Size:** The sample size selected for the research is 40. **2. Parameters of Interests:** The major parameter of interest is the subgroup of people who understand management-based application.

### **Data Collection Tool Used:**

The data collection tool used for the research is “Questionnaires” to get the primary data for the empirical research on customer preference on augmented furnishing application.

The Questionnaire which is attached below.

### **Questionnaire on Hotel Management System**

(We would like to know more about how you use augmented reality furnishing app in real life.it will help us to improve our application more user friendly)

1. (Personal Information)

Name: \_\_\_\_\_

Address: \_\_\_\_\_

\_\_\_\_\_

\_\_\_\_\_

E-mail Id: \_\_\_\_\_

2. (Demographics Information)

a) Gender

- Female
- Male

b) Age-Group

- Below 20
- 20-29
- 30-39
- Above 50

c)Occupation:

- Receptionist
- Manager
- Hotel employee

### 3. Project Related Questions

a) What will be better for managing a hotel's informations?

- Analog process (such as register khata)
- Modern Digital Process(such as digital computer system)

b) Have you ever faced troubles in analog system ?

- Yes
- No

c) What kinds of problems have you faced in analog system ?

- Managing data
- Data duplicity
- Losing Data
- Time Consuming
- Delay in Taking Orders
- Security Issues
- Others

d) Do you think it is important to digitalize the analog system?

- Not so important
- Important
- Very important

e) Reasons for replacing the current analog system?

- Needs Update
- Improving Efficiency
- Technical Issues

- Missing Features
- Bad Interface
- Growth Of Business

f) Have you ever used a computerized system to manage your hotel?

- Yes
- No

g) Which features you want in your system from below?

- Reservation Capabilities
- Guest Management
- Housekeeping Service
- Facilities Maintenance
- Restaurant Integration

h) What kind of information would you like to take from a customer?

- Name
- Address
- NID
- Age
- Contact info
- E mail
- Martial status

i) Do you want multiple language in your system?

- Yes
- no

j) Do you prefer separate accounts and authorized access for every employee?

- Yes
- no

k) Do you prefer staff information onto the system?

- Yes
- No

l) What categories of room you prefer in this system?

- VIP, Regular, Economic
- Premium(AC), Normal(AC),Normal(Non-AC), Economic

m) Would you prefer room pictures in your system?

- Yes
- No

think of a furniture augmented reality based app?

Features	Important	Less important	Very important
User friendly design			
3d view of every furniture			
Pay money after going outlet			
Outlet Address			
Seller's contact no			
Offers and discounts info			

n) Would you like to prefer discount system in your application ?

- Yes
- No

o) Which types of customers visit in your hotel ?

- Regular
- Non regular
- Traveler
- Sessional
- Foreigner

p) How many visitors come to your hotel per day on average?

- 20-50
- 50-100
- 100-200
- More
- Less

q) 18.Is there any food order system in your hotel?

- Yes
- No

q) Would you prefer separate food menu system for separate day-hour and also with their pictures?

- Yes
- No

r) In which way you prefer the payment system should be?

- Taking cash
- Online payment
- Taking cards
- Others

t) When using our system, as a user what affects your satisfaction the most?

Features	Less Important	Important	Very important
User Interface			
Easy to Use			
Authorized access			
Available information			
User Privacy			

S) Managing the system what importance these features will make?

Features	Less Important	Important	Very important
Online Payment			
Reminder Message			
Rooms Pictures			
Different Food Menu System			

Discount System
